# Wear parts BA/AZ

## Cross section BA/AZ

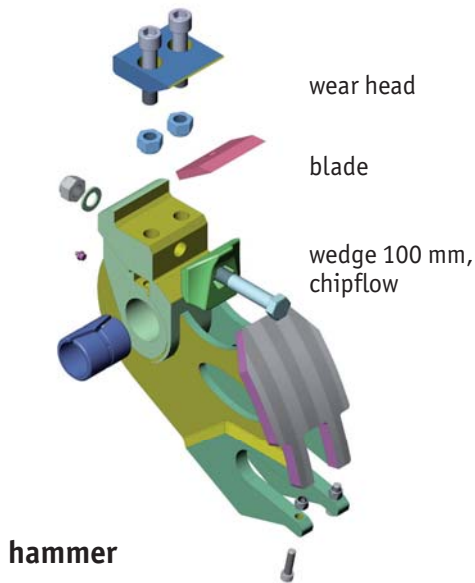

## Usage chart

|                    | green waste (biomass) | green waste (compost) | bio-waste (leaves, grass) | standing timber (roots) | domestic waste | waste wood (w/o foreign objects) | heavy waste wood | waste wood (precrushed) |
|--------------------|-----------------------|-----------------------|---------------------------|-------------------------|----------------|----------------------------------|------------------|-------------------------|
| easyfit with blade | X                     | X                     | X                         | X                       |                | X                                |                  |                         |
| easyfit CC         |                       | X                     | X                         |                         | X              |                                  | X                | X                       |
| easyfit HK         |                       | X                     | X                         |                         |                |                                  |                  |                         |
| hammer B50         |                       |                       |                           |                         | X              | X                                | X                | X                       |
| hammer B50 VC      |                       |                       |                           |                         | X              | X                                |                  | X                       |
| easycover          | X                     | X                     | X                         | X                       |                | X                                |                  | X                       |
| easycut            | X                     | X                     | X                         | X                       |                | X                                |                  | X                       |

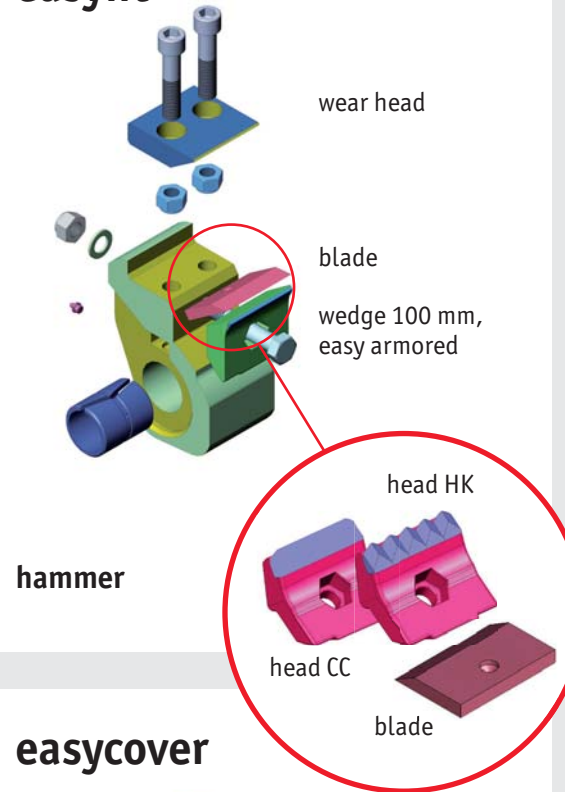

# easy system

INNOVATIONS

## easycut

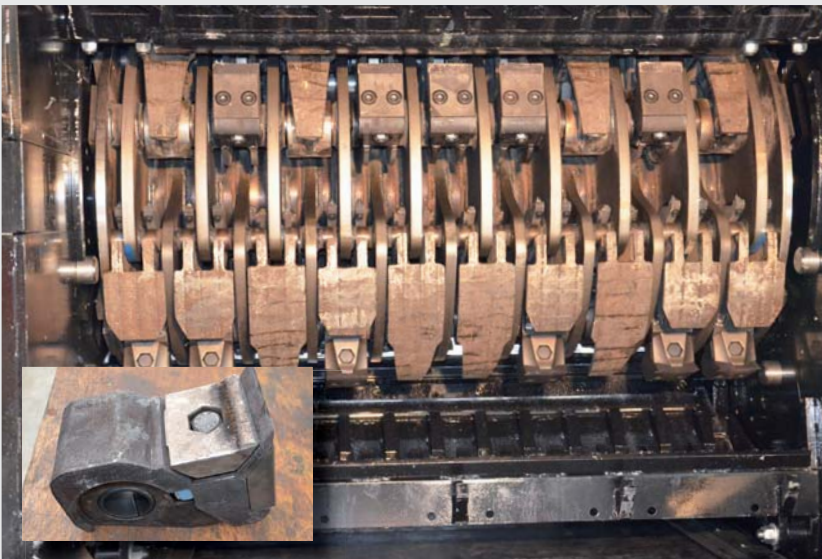

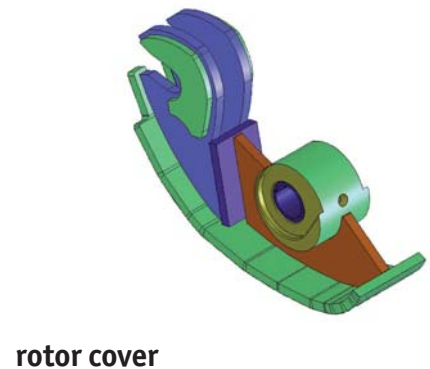

## easyfit

## easyguard

## easycover

## short facts

- for 35 mm and 50 mm hammer shafts
- one man assembly & easy maintenance with assembly tool
- considerably longer blade durability
- reduced fuel consumption
- higher throughput rate
- changeable wear head
