Take advantage of our knowledge

Epress is the leading manufacturer in the field of industrial hygiene. We focus on delivering total solutions: customer-focused systems, professionally integrated into your business process. By simplifying processes and sharing our knowledge, our wide product range enables us to add value to your business. Take advantage of our knowledge and let one of our specialists advise you.

Industrial washing systems

efficient, cost-saving and reliable

Elpress is the leading manufacturer in the field of industrial hygiene. We focus on delivering total solutions: customer-focused systems, professionally integrated into your business process. By simplifying processes and sharing knowledge, we can add value to your business with a complete range of products.

Industrial washing systems

Our industrial washing systems let you clean load carriers such as crates, pallets or boxes. Our systems are economical with the use of water, energy and cleaning agents. For efficient management of costs and the environment. Moreover, our installations are user-friendly and ergonomically responsible. The Elpress washing systems are of proven quality. Thinking ahead is in our DNA. Thinking ahead, but with proven principles.

Service

Service is our keyword. After you invest in our products, we continue to work with you. For maintenance and/or repairs, our daily operating mobile service vans carry the right equipment and knowledge on board. This enables us to provide you with optimal disposal in the short and long term. A complete package of solutions, therefore, always with a strong focus on you as our customer. Elpress is an ambitious organisation, and we can justifiably say we have a passion for hygiene!

Our development principles

The four basic elements of our approach:

Temperature

Time

Chemicals

Mechanical force

"To be the first choice for hygienic products, by developing leading solutions and providing added value while spreading our knowledge and passion for hygiene"

Conditions

Nothing in this document may be copied, published or disseminated in any other way without the written permission of Elpress BV. The information in this brochure has been compiled with care, and no rights may be derived from it. Articles, details and colours on the displayed images can differ from the actual products.

For the most recent information, please visit our website:

www.elpress.com

Product categories

one-stop-shopping

Personal hygiene

Maximum control of infection risks.
Functional, high-quality and hygienically designed.

Cleaning systems

Elpress cleaning systems have set the standard in the area of cleaning business and production areas since 1988.

Industrial washing systems

Efficient, cost-saving and reliable cleaning of your load carriers such as crates, pallets and boxes.

Components

All peripheral equipment that is used in a cleaning process. By maintenance contract or on demand. We maintain fast delivery times.

Drainage

Elpress drains and gutters are of excellent and proven quality.

Quality and safety

are important to us

Quality IE pumps

Our industrial washing systems contain high-quality IE pumps. These pumps produce a higher output than conventional pumps.

Rinse sensors

To avoid wasting water unnecessarily, our rinse zones are equipped with sensors that detect the presence of crates. If none is detected, the arch will stop in order to save water.

Modular structure

Thanks to their modular structure, Elpress washers are available in many sizes. Depending on the room, washing capacity and how long the crate remains in the washer, our experts and resellers can tell you which type of washer is recommended for your purposes.

Safety provisions

Our industrial washing systems are equipped with proven safety devices. For example, the system will shut down when someone opens the maintenance doors or when the pumps are about to run dry.

Stainless steel

The stainless steel we produce is processed by means of ceramic blasting. This results in a more hygienic surface roughness than, for example, the polishing or brushing of stainless steel. Our surface roughness of only 0.8 μm is ideal for the food industry.

Accessibility

High degrees of accessibility ensure that the washing systems can be easily approached for cleaning and maintenance purposes. In addition, the control panels have an uncomplicated and efficient design.

Industrial washroom

Areas of application

our industrial washing systems have a wide range of uses

Meat and fish industry

Our washing systems are used where the focus is on the slaughtering, further processing, enrichment, packaging and distribution of animals, such as beef cattle, pigs, chickens and fish. The predominant types of contamination are blood, fat, proteins and combinations of these, each of which needs to be dealt with in a specific way.

Bakeries

In this industry, the focus is on washing and drying systems for small and large bread production lines, patisserie, (dough) finished products and semi-manufactured goods. The predominant types of contamination are dough, fat and chocolate residues (sugar). Elpress also supplies systems for the washing of pans and baking moulds.

PVF

The processing, packing and distribution of potatoes, vegetables and fruit. The (further) processing of these products makes them susceptible to attack by bacteria, which emphasises how important it is to clean and dry the crates and containers properly. Types of contaminant include starch, sugars and fruit acids.

Dairy

The treatment, processing, packing and distribution of dairy-related products. Our washing systems are used both for raw milk products and in the further processing industry, such as the cheese and ice-cream industries. Contaminants that arise during production processes mainly consist of proteins and fats.

Confectionery

In the confectionery industry, our systems are particularly popular for the processing of liquorice, chocolate and sweets. The contaminants that are found here include sugar, syrup and dough residues.

Logistics

In this industry, Elpress washing systems are predominantly used in logistics (cask pool) organisations. This service industry is noted for a wide range of contaminants and crate/container types, with the focus being on achieving the right level of hygiene and a low cost price per crate.

Passion for Hygiene

Load carriers

crates, bins, casks, pallets, vats, moulds, standard containers...

The customer-specific standard

Process simplification comes high on our agenda. Our industrial washing systems have a modular structure. Their design also takes account of a wide range of different load carriers. This enables us to make our standard washing systems more customer-specific in return for an attractive investment.

Crate washer

EKW-1500

Overview

- Suitable for crates with maximum dimensions of 600 x 400 mm (based on E-crates).
- The capacity of this unit is a maximum of 170 crates per hour with a staying time of 45 seconds.
- The crates are passed through the unit with a track width of 600 mm.
- The maximum crate height is 410 mm.

Safety

- Emergency stop on control panel.
- Water level switch in wash tank to prevent the pumps from running dry.
- Protective cap over rotating parts.

Blow off units

EAB-ST

Overview

- The air blades produce a powerful 'cutting' air flow that blows excess water off the crates.
- The EAB-ST can be used as a modular option after a standard EKW crate washer.
- The blower units contain powerful 5.5 kW motors with a capacity of 1500 m³ at 6000 Pa.
- The motors are safely hidden away in the stainless steel enclosure.

Case study

and technical information

The EPW-45 with automated feed and removal.

General

Voltage
Fuse / A
Drive / kW
Controller
Length / mm
Width / mm
Height / mm
Infeed height of pallets / mm
Power of pump / kW
Pump capacity / m³ / hour
Tank capacity / ltr
Nozzles
Filter
Water connection
Overflow
Waste
Manhole / mm
Water consumption/ ltr / pallet

Options and accessories

ENW / EDW / EPW series

Dosing pump for cleaning or rinsing agent

Vapour extraction

Norm bin frame for EDW-20

Steam injection

Hot water coil

Electrical element

Article number	Description
83109110	Dosing pump for cleaning agent
83109115	Dosing pump for detergent - based on conductivity
83109120	Dosing pump for rinse agent
83109217	Vapour extraction
83109002	Heating by steam injection - max. 8 bar
83109005	Heating by hot water coil
83109015	Heating by electrical element - 20 kW
83109020	Heating by electrical element - 30 kW
83104306	Norm bin frame for EDW-20

Utensil washers

ETW-10 / ETW-15

► Wash volume ETW-10:
610 x 690 x 635 mm (hxwxd)

► Wash volume ETW-15:
610 x 810 x 635 mm (hxwxd)

Utensil washer

ETW-30

- Wash volume ETW-30:
645 x 1290 x 635 mm (hxwxd)

General	ETW-30
Width / mm	1555
Depth / mm	745
Height closed / mm	1631
Height open / mm	2088
Electrical connection	400 V / PE / 50 Hz
Power / kW	17.5
Volume of wash tank / ltr	125
Capacity / ltr / minute	600 + 950
Volume of wash tank / ltr	25
Cleaning time / sec	20
Rinse water temperature / °C	85
Water consumption per cleaning cycle / ltr	12
Water connection	½"
Nett weight (without water) / kg	280

The utensil washer can optionally be equipped with soap dispenser, integrated mixer tap and an external hose.

Elpress is the leading specialist in the field of industrial hygiene. We focus on the delivery of total solutions: customer-focused systems that are expertly integrated into your business process. By simplifying processes and sharing our knowledge, our wide product range enables us to add value to your business.

Years of experience has led to high-quality products. Reliability and user-friendliness have been proven in practice. Thanks to the broad possibilities of our products, we offer a solution for every challenge.

We have a Passion for Hygiene!
