

- a strong solution for the environment

The great advantage of the ReTec Mobile Security Shredding System is, according to Poul Henrik Schou, the possibility of shredding hard drives and tapes as well

CASE: Dansk Sikkerheds Makulering, May 2013

DANSK SIKKERHEDS MAKULERING ERASES ALL TRACES

Dansk Sikkerheds Makulering is a company within Poul Schou Group and are experts in security shredding of confidential documents, ring binders, CD's and hard drives.

About the Mobile Security Shredding System from ReTec

Dansk Sikkerheds Makulering has since the beginning of 2013 bought 3 mobile security shredding systems from ReTec. The systems are built on a city trailer with a rotating shaft and an UNTHA RS 50 shredder makes the shredding. The capacity per hour is approx. 1100-1400 kg.

Quality pays off in the long run

According to the 3rd generation of Schou and present CEO, Poul Henrik Schou, it is not a coincident that 3 out of their 5 security shredding plants is made by ReTec: "The plants from ReTec are characterized by high quality, which ensures the best conditions for our drivers in relation to workflow, operation and safety. Furthermore, it is an advantage, that the ReTec is within a nearby driving range. Their flexibility, level of service and eager for further development have all together contributed to the valuable relationship which we have built up through the years. For us it is important to work together with a reliable company. We are satisfied with the system, and the high quality will pay off in the long run."

Security Shredding at Dansk Sikkerheds Makulering

Dansk Sikkerheds Makulering operates in Denmark with 4 mobile units, which covers the demand from the customers. If there is a need for further capacity at peak periods they have a fifth plant, which is also used during service and maintenance of other plants.

Customers are charged for a minimum of 100 kg of material per visit, Poul Henrik explains further: "That the single biggest task, which the company has handled, was a job of 80,000 kg of paper for shredding."

About Dansk Sikkerheds Makulering

Today Dansk Sikkerheds Makulering is one of the leading companies in Denmark within security shredding of confidential documents, ring binders, CD's and hard drives. They have been operating within this business since 1988. The entire market was throughout the 90s generally stagnant until the dot-com bubble in 2000. The demand for shredding of documents increased, which made the business grow.

In 2003 Dokumenthotellet was founded, as a synergy to Dansk Sikkerheds Makulering. They offer storage of confidential documents in their fire- and theft proof environment.
